

TECH TALK: DAD, SON, KUBERNETES

Swipe →

A man in a black puffy jacket and grey pants is pushing a young child on a red tricycle. The child is wearing a red puffy jacket, dark pants, and a yellow beanie with space-themed patches. They are both laughing. A yellow arrow points from the text to the man's right leg.

Let's go
full speed!

SON

Dad, what's this
Kubernetes thing
everyone's talking
about?

Mutha Nagavamsi
@muthanagavamsi

DAD

Ah, Kubernetes is like a very-smart manager for running code. It keeps them organized to run smoothly.

Mutha Nagavamsi
@muthanagavamsi

SON

Cool! So, how does it work? Can you give me an example?

Mutha Nagavamsi
@muthanagavamsi

DAD

Well, imagine you and your friends are working together on a project. Kubernetes helps you all to coordinate tasks and communicate efficiently.

Mutha Nagavamsi
@muthanagavamsi

SON

Dad, can Kubernetes
help me with my
homework too?

Mutha Nagavamsi
@muthanagavamsi

DAD

Haha, I wish! But it is not
a homework assistant.
Maybe, you should recruit
your friend, ChatGPT!

Mutha Nagavamsi
@muthanagavamsi

SON

Haha, but what are those
'pods' I keep hearing
about?

Mutha Nagavamsi
@muthanagavamsi

DAD

Think of pods as small groups of programs (**containers**) that work together as a team. Kubernetes helps manage these pods, making sure they're always ready to work.

SON

Nice! But what if I
want to add new
features?

Mutha Nagavamsi
@muthanagavamsi

Mahesh Mahajan

DAD

That's where 'deployments' come in. They let you introduce updates to your programs without causing any disruptions.

Mutha Nagavamsi
@muthanagavamsi

SON

Nice, Dad. I really want
to name my pet fish -
Kubernetes, because I
love both of them now :)

Mutha Nagavamsi
@muthanagavamsi

DAD

Haha, you can, but
remember that it won't
manage the fish tank. It's
just a cool name for a pet.

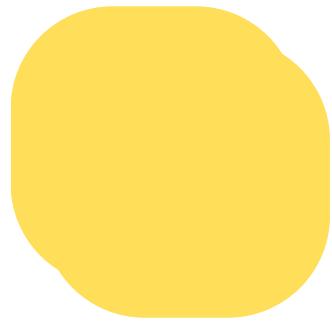

Mutha Nagavamsi
@muthanagavamsi

SON

How do I know more about Kubernetes?

Mutha Nagavamsi
@muthanagavamsi

DAD

Great! You can start
from here:

kubernetes.io/docs/;

Who knows, maybe one
day you'll become a
kubernetes ninja!

Mutha Nagavamsi
@muthanagavamsi

That's it. We Thank
Mahesh for the Collab :)

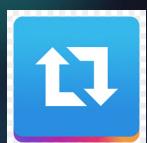

Thank you all for reading!
Me & Ishaan Love you guys!

MUTHA NAGAVAMSI
